The **General Management** defines the Environmental and Safety Policy of PPM Industries SpA, which has two production facilities in Italy:

- Calusco d'Adda, where paper impregnation and solvent-based coating with natural rubber and water-based acrylic are produced.
- Brembate Sopra, where hot-melt adhesive tape coating and converting into adhesive tape rolls are produced.
- PPM Industries SpA also has an administrative and sales office in Presezzo.

PPM Industries SpA is committed to implementing the principles contained in this Policy, aware of its role in safeguarding and protecting the natural environment and ensuring the health and safety of people at work.

This policy is communicated to all employees of the organization, its suppliers, and its customers.

It is available to anyone upon request.

Compliance with Legislation

PPM Industries SpA is committed to verifying and maintaining compliance with EU, national, and local environmental and occupational health and safety legislation.

Continuous improvement of the environment, health, and safety at work

PPM Industries SpA is aware of the need for a preventative approach aimed at minimizing and eliminating (where possible) undesirable effects on the environment and on workplace health and safety conditions resulting from its activities, products, and services.

For this reason, it plans and implements the necessary measures to promote continuous improvement of its environmental performance and occupational health and safety conditions.

To this goal, it is committed to defining objectives and targets, which are integrated with operational management and corporate development programs.

Environmental compatibility of products and technologies

PPM Industries SpA is committed to designing new products taking into account significant environmental aspects in order to minimize the environmental impacts associated with the product's life cycle.

When adopting new production technologies, preference will be given to those that, while providing the same performance, generate the least environmental impacts, with particular attention to energy consumption, water consumption, atmospheric emissions, and waste production.

The best environmental technologies will be adopted, consistent with the economic and financial capacity of PPM Industries SpA.

Awareness and Involvement of Staff, Collaborators, and Suppliers

In order to implement the objectives defined and consistent with this Policy, PPM Industries SpA promotes information and training activities for its staff on the objectives of its environmental and workplace safety policy, so that they understand the implications for their role within the company and their behavior at work.

It is also committed to selecting and promoting the development of suppliers and subcontractors in accordance with the principles of this policy, encouraging them to maintain behavior consistent with it.

**Information and Dialogue with the Public**

PPM Industries SpA intends to foster open dialogue with the public and local authorities by developing specific information tools regarding the environmental impacts of its activities, products, and services and its commitment to minimizing them.

Monitoring and Performance Verification

PPM Industries SpA ensures a reliable and comprehensive system for collecting the data necessary to monitor performance and achieve established objectives.

Conducts checks, inspections, and audits to identify and prevent any non-compliance with the objectives set for environmental protection and occupational health and safety.

Review

PPM Industries SpA periodically reviews its environmental and occupational safety policy and objectives to assess their accuracy and effectiveness, with a view to continuous improvement.
